

Your system should work like political campaigns do.

A donation becomes a compliance record. A conversation at the door shapes the next ask.

Campaign activities connect. Your workflows should, too.

Campaigning has changed a lot in the last 10 years. Has your software?

Yesterday's campaign management software was a collection of disconnected tools with capabilities slapped on for additional cost, needing a specialist to know how to run it all. Half of what you pay for are features no one knows how to use.

FUNCTIONS YOU'LL ACTUALLY USE

Photograph the check. Amount, donor, date, and the image, all recorded without typing. Same for receipts at the register.

No signal, no lost work. Contacts queue on the phone and data logs sync when the signal comes back.

Problems get flagged when entered. Duplicates and missing addresses are caught while you can fix them.

ONE 55-ENTRY FILING

2h 45m by hand.
10 minutes in VoteCivic.

No paid module add-ons. No per-seat pricing.
No software expert required.

Everything in one place. Done better.

Compliance

Filing rules built in the workflow. Problems flagged when they're edits, not violations.

Fundraising

Donation pages, donor records, and limit checks before accepting the funds.

Field

Click-to-cut turf, full conversations captured, and canvassers visible live on a map.

Planning

Shifts, tasks, volunteers, and filing deadlines on one calendar.

Voter list

Your district loaded and mapped. Quality data in tools that can act on it.

EARLY ACCESS

Pilot pricing through 2026. Use every production-ready capability, receive new ones as they ship, and get direct access to our development team.
