

Campaign management has changed in the last 10 years. Has your software?

Consultants who lead the change will have an advantage in every race they advise.

Better software for every campaign you advise.

Everything in one place.

Compliance

Filing rules built into the workflow. Problems flagged when they're edits, not violations.

Fundraising

Donation pages, donor records, and a limit check before processing.

Field

Click-to-cut turf, full conversations captured, and canvassers visible live on a map.

Planning

Shifts, tasks, volunteers, and filing deadlines on one calendar.

Voter list

Your districts loaded and mapped. Quality data inside tools that can act on it.

What VoteCivic means for consultants.

One login across every campaign you advise, with a different access level for each. Choose what each campaign sees on your calendar: details, busy, or nothing. And we do the onboarding, training, and support so you don't become IT.

VoteCivic is an operating system for political campaigns that brings compliance, filing, fundraising, field, and planning into one system with one data source.

Not just connected. Better.

Take a picture of the check and the donation goes in the ledger.

Take a picture of a receipt and it's recorded before it gets lost.

Canvassing continues even when the signal drops.

Enter it once and you're done. No copy/paste. No toggling.

ONE 55-ENTRY FILING

2h 45m by hand.

10 minutes in VoteCivic.

EARLY ACCESS

Consultant Partners joining now set their own pilot pricing and earn a revenue share on every campaign they bring in. Campaigns get every feature that's ready, plus everything that ships.
